Operating Instructions

IB0001

Please read and save these instructions. Read carefully before attempting to assemble, install, operate or maintain the product described. Protect yourself and others by observing all safety information. Failure to comply with instructions could result in personal injury and/or property damage! Retain instructions for future reference.

Description

The 3-in-1 PowerPal® is a portable, rechargeable jump starter, inflator and 12 Volt DC power source.

Use it to quickly and easily jump start any standard 12 Volt DC vehicle battery. Its sealed, lead-acid battery is packaged in a compact, durable case that features a built-in carry handle and a rear holster for storing the system's heavy duty, 24" booster cables and clamps. LEDs keep you informed as to the status of the battery.

The high-pressure inflator with flexible hose, universal adapter, inflation nozzles / needle and air pressure gauge can be used for emergency roadside tire inflation and to inflate bike tires, soccer balls, beach balls and other sporting equipment.

The built-in 12 Volt DC power source works just like your car's cigarette lighter outlet, giving you the power to operate cell phones, TVs, camcorders, work lights, radios, etc.

A 120 Volt AC Adapter lets you conveniently recharge the system using a standard 120 Volt wall outlet, while a 12 Volt DC Cord gives you the ability to recharge the system using an available car or boat battery.

Unpacking

When unpacking this product, carefully inspect for any damage that may have occurred during transit.

Safety Guidelines

This manual contains information that is very important to know and understand.

This information is provided for SAFETY and to PREVENT EQUIPMENT PROBLEMS. To help recognize this information, observe the following symbols.

⚠ DANGER

Danger indicates an imminently hazardous situation which, if not avoided, WILL result in death or serious injury.

⚠ WARNING

Warning indicates a potentially hazardous situation which, if not avoided, COULD result in death or serious injury.

⚠ CAUTION

Caution indicates a potentially hazardous situation which, if not avoided, MAY result in minor or moderate injury.

ℹ NOTICE

Notice indicates important information, that if not followed, may cause damage to equipment.

General Safety

Completely read the manual included with this product carefully. Be thoroughly familiar with the proper use of the unit.

Any misuse of unit could cause property or equipment damage and/or personal injury.

⚠ WARNING

Working in the vicinity of lead acid batteries can be dangerous. Before using this product to jump-start any vehicle or power any equipment, read and follow instructions in this manual, on the product labeling and in the instruction manual / safety information provided by the vehicle and/or vehicle's battery system manufacturer. Following all manufacturers' instructions and safety procedures will reduce the risk of accident.

⚠ WARNING

Possible explosion hazard – dangerous hydrogen gas can be released from batteries while charging, jump starting and during normal operation. Sparks can ignite the gas in an enclosed space. Unit should be used in a well-ventilated area.

⚠ WARNING

Never smoke or allow a spark or flame in the vicinity of the battery. Never expose the battery to fire or intense heat as it may explode.

⚠ WARNING

Wear ANSI approved Z87.1 safety glasses when working with or near lead acid batteries.

An assistant should be present or close enough to come to your aid in the event of an emergency. Have a reliable source of fresh water and soap nearby in case battery acid contacts clothing, skin or eyes.

Avoid touching your eyes when working around lead acid batteries.

⚠ WARNING

If battery acid contacts your eye(s), flush with cold running water for 15 minutes and seek immediate medical attention. If acid contacts your skin or clothing, wash immediately with soap and water. If irritation persists, seek immediate medical attention.

⚠ WARNING

Remove jewelry and metal objects when jump starting a vehicle. They can cause short circuits or react with battery acid to cause severe burns.

⚠ WARNING

Do not wear vinyl clothing when jump starting a vehicle because static electricity sparks are generated when vinyl clothing is rubbed.

REMINDER: Keep your dated proof of purchase for warranty purposes! Attach it to this manual or file it for safekeeping.
